

A COMPANY IN THE KAMIC GROUP

On 4th February SIGA (Electronics) Ltd. acquired the business and assets of Stabilised Transformers Ltd.

SIGA (Electronics) Ltd is a leading manufacturer of all types of toroidal and bobbin wound components, and associated assemblies. Established in 1961, the company has steadily expanded and market sectors supplied include: medical, aerospace, railways, satellite, test equipment, underwater vehicles (ROVs), as well as the general electronics industries. SIGA is able to manufacture and supply any quantity from 1 off to many thousands off and are able to design to meet customers' electrical specification, or can build to print. SIGA occupies a purpose built, 15,000 sq.ft factory in Sandy, Bedfordshire where over 50 employees produce a wide range of high quality transformers and inductors. A custom engineering team is based at the same location. SIGA supplies wound components conforming to international standards, including EN61558, EN60601, and EN60950, and in addition a range of standard and custom toroidal transformers UL Approved to UL506. SIGA focusses on design led solutions based on product customisation with R&D and engineering being a key element of the service.

SIGA itself was acquired by the Swedish KAMIC Group in September 2018, and works within the Business Magnetics Division alongside ETAL

The acquisition offers significant benefits to Stabilised Transformers as well as to SIGA customers. Stabilised Transformers customers will continue to enjoy access to the products, technology and service that they have always received, but now delivered from within the context of a much larger organisation offering many additional capabilities and opportunities. SIGA has the opportunity to expand through access to the Stabilised Transformers customer base and technology. Specifically, it can offer its customers the company's High Voltage and High Power transformer technology to its full customer base

KAMIC Group is a corporate group consisting of nearly 30 companies active in trade and manufacturing each of which aims to be a leading supplier of technical products and services in a number of well-defined product and market niches. It includes two specialist magnetic components businesses, SIGA Electronics and ETAL Group. ETAL develops, manufactures and sells magnetic components to a world-wide market through offices in Europe, Asia and through distribution partners in an additional 20 countries. KAMIC Group is present in 12 countries in Northern Europe, Asia and the US, and employs around 700 people. Its annual net revenue amounts to some SEK 2 billion. Many of our customers are multinational industrial companies with global manufacturing.
